-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 1775

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-2,4,6,25 are rejected under 35 U.S.C. 102(b) as being anticipated by Cerutti et al (5,273,557) or Fuller et al (4,919,220).

The rejection is maintained to the previous claims and applied to new claim 25 for reasons of record in the previous office action. Applicant's arguments filed 12/28/05 have been fully considered but they are not persuasive. Both Cerutti et al and Fuller disclose the wetting of the diamond and substrate layer (column 3, line 34-35 and column 4, lines 58-60 respectively), which anticipates the claimed invention. While the applicant argues that these inventions disclose conventional brazing, the languages in the claims do not distinguish over the prior art, and thus the rejection stands.

3. Claims 1,4,6,25 are rejected under 35 U.S.C. 102(b) as being anticipated by Cho et al (5,151,107) or General Electric (EP 402 671).

The rejection is maintained to the previous claims and applied to new claim 25 for reasons of record in the previous office action. Applicant's arguments filed 12/28/05 have been fully considered but they are not persuasive. Both Cho et al and General Electric disclose the wetting of the diamond and substrate layer (column 9, lines 1-3 and column 8, 47-48 respectively), which anticipates the

Art Unit: 1775

claimed invention. While the applicant argues that these inventions disclose conventional brazing, the languages in the claims do not distinguish over the prior art, and thus the rejection stands.

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claim 5 is rejected under 35 U.S.C. 103(a) as being unpatentable over Cerutti et al or Cho et al or Fuller et al or General Electric (as before) in view of Natl Ins for Res in Inorg Mater (JP 04-114966 or JP 04-074766).

The rejection is maintained for reasons of record in the previous office action.

Applicant's arguments filed 12/28/05 have been fully considered but they are not persuasive. Since the above rejections stand, the examiner has also maintained this rejection in which JP 04-114966 or JP 04-074766 discloses the claimed composition of the compact..

6. Additional prior art is provided to also show more pertinent art.
7. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Archene Turner whose new telephone number is (571) 272-1545. The examiner can normally be reached on Monday, Wednesday through Friday from 10:30 am. to 6:00 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Jennifer McNeil can be reached on (571) 272-1540.
